

Dr. Aggie Iwaszczyszyn, DMD

("Dr. Aggie")

At **Hart Dental** we believe in convenience and quality care above all. We offer most services under one roof—general and family dentistry seeing patients as young as 6 months, cosmetic dentistry, orthodontics, and surgery. I work with my mother, Dr. Iwona Iwaszczyszyn, DDS, and together with our staff we treat everyone like family.

We believe in conservative treatments, offering the most non-invasive and preventative approach to all patients, with long-term success always in mind. Here are some of our protocols.

Conservative treatment with silver diamine fluoride in no-drill pediatric fillings: We can sometimes remove the decay without drilling, place the fluoride, and place a fluoride releasing filling over the cavity. Often, even if we have to drill, we do not need anesthetic. It is amazing and helps us win over even the most scared kids. We also offer nitrous laughing gas!

We offer Bioclear cosmetic bonding when porcelain veneers would be too aggressive and remove too much tooth structure. It is a modern, innovative approach to create an incredibly strong and long-lasting restoration, even without drilling. When necessary, we offer surgery and implant dentistry as well, but in most cases, we save natural teeth as often as possible. We offer multiple in-house services to help save broken teeth—if they can be saved, we will save them. Implants are an amazing option, but we believe in saving natural teeth whenever possible.

Our goal is to make dentistry fun and relaxing for even the most anxious patients—that is why we offer nitrous and oral sedation to help you relax and forget your appointment ever happened.

We know dentistry can be invasive and confusing, and we welcome patients' feedback to make their appointments better. We offer moisturizing lip balm, headphones, neck pillows, blankets, bite blocks (ranging in sizes), TVs playing your favorite show or music, massaging chairs, and unlimited breaks; if you need a break, let us know. We can talk you through the whole appointment or work in silence. Whatever you prefer. If we do not have something to make your appointment better, we will get it.

We invite you and your family to our dental practice. Call or text today for an appointment.
