Dr. Renee Burke (center) and her highly-trained staff of medical professionals.

Board-certified plastic surgeon Dr. Renee Burke and the entire team at our Barrington plastic surgery practice and med spa are intent on meeting and exceeding expectations from the moment a patient walks through the door throughout their aesthetic journey. Women and men choose our practice because we provide genuine care and concern in beautiful, contemporary surroundings. Ultimately, our goal is to achieve an outcome for our patients that restores the self-confidence they are hoping to find.

When you think of cutting-edge plastic surgery in Barrington, you may automatically think of the office of Dr. Renee Burke. But did you know that at her office, there are five highly specialized providers of non-surgical and minimally invasive treatments to address all your beauty and wellness concerns? It is this combination of surgical and non-surgical providers that bring you the most innovative and up-to-date treatments available. Today, we want to spotlight these extraordinary women and see what they are most excited about for 2021.

Cara, RN: "Most of us know the amazing things Botox can do for the forehead and around the eyes, but I absolutely love seeing the tightening, smoothing, and slimming effects from Botox on the lower face and neck. Treating the muscles of the jaw can reduce grinding and create a slimming look, while treating the neck can reduce laxity and crepiness and accentuate the jawline."

Shannon, RN: "One word—Carboxy! This is the absolute BEST treatment for cellulite, stretch marks, and loose/crepey skin in stubborn locations (think above the knees, arms, back of legs, and buttocks). Imaging taking a smoothing filter to your legs, but in real life!"

Gena, Esthetician: "NeoGraft® is a game changer for hair transplantation. While you may see other systems heavily advertised, NeoGraft is the gold standard in quality, natural-appearing hair transplantation. No one will ever have to know!"

Nicole, Esthetician: "Plasma pen has been a game changer in my hands. I am seeing amazing results in the upper and lower eyelids for people who don't want surgery, as well as dramatic skin tightening in the neck and chest, and serious smoothing of those annoying wrinkles around the mouth."

Samantha, FNP: "I love CoolTone™. As a busy mom of two, getting to the gym everyday can be a challenge. Now, I can hop on CoolTone and get the equivalent 25,000 crunches in 30 minutes. Combine this with CoolSculpting® and really show those abs, thighs, and glutes!"
