Information regarding our general surgery, breast surgery, and colorectal surgery can be found by visiting: advancedsurg.net. Information regarding our bariatric program—Advanced Bariatrics—can be found by visiting advancedbariatrics.com.

We are board-certified general surgeons with specialties in colorectal surgery, breast cancer surgery, and bariatric surgery. Our team strives to provide the most advanced techniques and technology available in medicine today. We excel at a range of procedures including robotic surgery and minimally invasive surgery. For the most complex procedures, our physicians work side by side in the operating room to ensure the best possible outcomes for our patients. We are life-long learners whose commitment to excellence translates into exceptional care and outcomes for our patients.

At **Advanced Surgical Care**, we have created an environment designed to support our patients throughout their diagnosis, treatment, and recovery. Our team of caring medical assistants offers wrap-around support. They work closely with each of our patients, offering a concierge-like experience. They help patients navigate the entire process by assisting with the scheduling of appointments with primary care providers, imaging specialists, oncologists, and nutritionists. Our goal is to ensure that each of our patients

receives exceptional care from both a medical and human perspective.

Our Bariatric team is led by fellowship-trained bariatric surgeons and fellows of the American College of Surgeons, Dr. John Cheregi and Dr. Hsin-Yi Chang. Advanced Bariatrics was created to help people who struggle with obesity to confront and overcome their challenges and discover a happier, healthier way of life.

For many people, obesity is a chronic condition that requires medical intervention. At Advanced Bariatrics, we are committed to providing a judgment-free environment. We work closely with our patients to develop a treatment plan that will redefine what the future looks like.

The collaborative approach used by Dr. Chang and Dr. Cheregi is designed to help our patients identify the plan and procedure that will help them achieve success. Our doctors are passionate about being there every step of the way during what becomes a life-changing journey for most of our patients.

We are accepting new patients. Call for a consultation to discuss your possibility to lose up to 80-120 pounds in the first year after surgery!
