Your Smile is Healthy. Your Smile is Confident. Your Smile Studio

Having been a part of Barrington for over 35 years, Wright Dental has built a legacy around trust, dental excellence, and community. Our goal moving forward is and always has been to honor this legacy and continue to positively impact the many lives we have the privilege of caring for. That is why we are excited to launch the next generation of our practice that comes with a new name, transition of ownership, but the same commitment to our patients.

Dr. Rob started practicing at Wright Dental in 2018 and he immediately felt the sense of pride that surrounded being a part of the Barrington community. Originally from Winfield, he grew up around his late father's dental practice and in doing so, he watched his father play a major role in the community and support local businesses. Dr. Rob has always looked to emulate that by finding this same feeling with his dental practice and in Barrington, he quickly knew he had found that.

Dr. Rob, his wife Chelsea, and son Leo

Our new name, Your Smile Studio, represents an incredible legacy, our authentic style of practice, and the creation of lasting relationships. Dentistry is a combination of artistry, healthcare, education, and service. The most important part of it all is feeling comfortable in an environment where you are cared for, receive clear communication, and have the utmost confidence that you are in the best of hands.

When we committed to Your Smile Studio, we committed to ingrain in our patients that our care and focus is fully on them, their health, and helping them bring to life their version of a confident smile.

It is Your studio to express your concerns, questions, or ideas. It is Your studio to feel heard and cared for. It is Your studio to feel connected to the staff and overcome the standard fear of going to the dentist. And it is Your studio to collaborate on bringing to life the healthiest and most confident version of your smile. We want you to know this is your smile studio, as much as it is ours. Our priority will always be you, your health, and your experience in our care.

We feel very fortunate to serve the Barrington and greater Northwest Suburb communities through our passion for care and pursuit of providing an unparalleled dental experience.

"The patients that I became introduced to through the practice emulated what it meant to take pride in where you live. Everyone was so incredibly welcoming and very helpful in becoming acclimated to a place that they love so clearly. Over the last 4 years this feeling has only grown and I am very fortunate to have the opportunity to serve and give back to a community that welcomed me with open arms."
